Anticipation/Reaction Guide

Instructions: Respond to each statement twice: once before the assembly program and again after the assembly program.

- Write **True** if you agree with the statement
- Write **False** if you disagree with the statement

Response Before Assembly	TOPIC: Honey bees	Response After Assembly
	Honey bees "communicate" with one another by "dancing."	
	There are only three types of honey bees.	
	Honeybees live in a large group called a colony.	
	Every hive of bees has at least two Queen bees.	
	Drone bees clean the hive and defend the hive.	
	House bees are usually female.	
	Field bees are usually male.	
	A field bee can visit ten flowers a minute.	
	The "round" dance warns the hive of predators.	
	The honey bee's greatest contribution is pollination.
